

University of Haifa
The Faculty of Social Sciences
Computers and Information Systems
Winter 2019/2020 (November 1 – December 20)
Exam: December 26
International MBA (209.4810) ; Global Green MBA (209.8150)
Instructor: Dr. David Bodoff (dbodoff@univ.haifa.ac.il)

Course Philosophy and Goals

The goal of the course is to enable a general manager to make better Information Technology ("IT") decisions.

The method of learning is based on case studies. The goal is to *practice* making complex managerial decisions related to IT management. The course is geared toward aspiring CEO's, CIO's, and other senior managers. This course will *not* provide you with a list of software programs currently on the market.

The course has a core component that is taught to all MBA students, plus special topics that are specific to the Green/International group.

Course Outline: See Detailed Schedule below

Methodology

Lectures are supplemented by

- case study presentations, done for homework in groups
- in-class written exercises, done individually
- in-class discussions

Course Requirements

Students are required to complete the following:

- a) Read assigned "case studies" before class
- b) A quiz on each case study. Every student takes every quiz
- c) Present case studies, in a group of 3 students
- d) 2 exercises that are done in class, for a grade
- e) A final exam
- f) Participate in class discussions

Attendance requirements follow school policy. A schedule of ALL your assignments is found at the end of this syllabus.

More about Case Study Assignments (item 'c' above)

- Each week 2 or 3 groups of students will make a 5-minute PPT presentation on the questions that I asked for that case. Maximum 5 slides.
- Guidelines: A good presentation is a convincing one. It will answer the questions using a clear and logical argument, supported by facts from the case. It is not necessary to guess what the instructor thinks, and it is not necessary to use ideas from the lectures. It is only necessary to present a clear and compelling argument based on your own experience and logic, together with the facts as they are presented in the case.
- Do not ask former students or otherwise collect information from previous cohorts about a "good" way to analyze the case. Any such attempt will result in a failing grade for the course, as well as additional sanctions.

Individual In-class assignments

On 2 occasions you will do individual written work, during class, for a grade. If you miss one or both of these classes, it is your responsibility to contact me and make up the work.

Grades

Group Work -- Case presentations (Pass required, but no grade)

Individual work (100%)

5 Quizzes (25%)

Attendance and Participation in classroom discussion (15%)

In-class exercises (Pass required, but no grade)

Exam (60%)

Materials

You will be given these Harvard cases:

Moore Medical Corporation, case # 9-601-142

Rich-Con Steel, case # 9-699-133

Banking on Social Media (A), case #W14684

Apple and its Suppliers, case #W16147

The ITC eChoupal Initiative, case #9-604-016

There is no textbook.
